INDEX TO SUBJECTS

A

Abstracts of papers presented at the Twenty-Eighth Annual Meeting of the Society of General Physiologists, follows p. 729
Acetylcholine receptors, revised estimates of extrajunctional receptor density in denervated rat diaphragm, 468
Acid, amino, neutral transport system in rabbit ileum, structure-affinity relationships of substrates for, 443
Active lateral interactions, preparations with, light-induced changes in photoreceptor membrane resistance and potential in gecko retinas, 49
Activities, ATPase, and calcium-binding properties of rat liver plasma membranes, 104
Activity, electrical, and membrane potential, effect on, of adding sodium to sodium-depleted cardiac Purkinje fibers, 473
Adaptation, light, in the ventral photoreceptor of *Limulus*, 166
Adenosine triphosphatase activities and calcium-binding properties of rat liver plasma membranes, 104
— triphosphate, effect of, on the calcium efflux in dialyzed squid giant axons, 503
Adult, denervated, and tadpole leg muscle, multimodal distribution of frog miniature endplate potentials in, 85
Aequorin, detection with, changes in intracellular free calcium concentration during illumination of invertebrate photoreceptors, 643
Affinity-structure relationships of substrates for the neutral amino acid transport system in rabbit ileum, 443
Albumin solutions, facilitated diffusion of CO_2 across, 356
Amino acid transport system, neutral, in rabbit ileum, structure-affinity relationships of substrates for, 443
Anhydrase inhibitors, carbonic, used in short circuiting of the ocular oxygen concentrating mechanism in the teleost *Salmo gairdneri*, 263
Antidiuretic hormone-independent osmotic flow rectification, osmosis in cortical collecting tubules, 228
Arterial smooth muscle, force-generating capacity and contractile protein content of, 691
Associative training of *Hermissenda*, 70
Axons, dialyzed squid giant, effect of ATP on the calcium efflux in, 503
—, voltage clamped crayfish, ionic conductance changes in, at low pH, 666

B

Bladder epithelium, toad urinary, passive electrical properties of, intercellular electrical coupling and transepithelial cellular and shunt conductances, 1
Blood cells, red. *See* Erythrocytes.
Bulk diffusion coefficients, red cell membrane permeability deduced from, 706

C

Calcium concentration, intracellular free, changes in, during illumination of invertebrate photoreceptors, detection with aequorin, 643
— efflux in dialyzed squid giant axons, effect of ATP on, 503
Calcium-binding properties and ATPase activities of rat liver plasma membranes, 104
Capacity, force-generating, and contractile protein content of arterial smooth muscle, 691
Carbon dioxide, facilitated diffusion of, across albumin solutions, 356
Carbonic anhydrase inhibitors, used in short circuiting of the ocular oxygen concentrating mechanism in the teleost *Salmo gairdneri*, 263
Cardiac Purkinje fibers, effects of epinephrine on the pacemaker potassium current of, 293
— Purkinje fibers, mode of action of chronotropic agents in, does epinephrine act by directly modifying the external surface charge? 320
— Purkinje fibers, sodium-depleted, effect on membrane potential and electrical activity of adding sodium to, 473

Cells, red blood. *See* Erythrocytes.
Cellular and shunt conductances, transepithelial and intercellular electrical coupling, passive electrical properties of toad urinary bladder epithelium, 1
Cellular, intra-, free calcium concentration, changes in, during illumination of invertebrate photoreceptors, detection with aequorin, 643
Charge distribution of glycerol-extracted muscle fibers in rigor, relaxation, and contraction, differences in, 551
—, external surface, does epinephrine act by directly modifying, mode of action of chronotropic agents in cardiac Purkinje fibers, 320
Chlorella, hexose-proton cotransport system of, pH-dependent change in K_m values and translocation constants of the uptake system, 568
Chronotropic agents in cardiac Purkinje fibers, mode of action of, does epinephrine act by directly modifying the external surface charge? 320
Compliance, muscle, and the longitudinal transmission of mechanical impulses, 623
Conductance changes, ionic, in voltage clamped crayfish axons at low pH, 666
Conductances, transepithelial cellular and shunt, and intercellular electrical coupling, passive electrical properties of toad urinary bladder epithelium, 1
Contractile protein content and force-generating capacity of arterial smooth muscle, 691
Contraction, rigor, and relaxation, differences in the charge distribution of glycerol-extracted muscle fibers in, 551
Controlled movement, phytochrome, potassium flux and leaf movement in *Samanea saman*, 431
Controlling mechanism, volume, in enlarged duck red cells, functional separation of the Na-K exchange pump from, 393
Cortical collecting tubules, osmosis in, ADH-independent osmotic flow rectification, 228
— collecting tubules, osmosis in, a theoretical and experimental analysis of the osmotic transient phenomenon, 201
Coupling between active sodium transport and oxygen consumption, nonequilibrium thermodynamic analysis of, 372

D

Denervated, adult, and tadpole leg muscle, multimodal distribution of frog miniature endplate potentials in, 85
— rat diaphragm, revised estimates of extrajunctional receptor density in, acetylcholine receptors, 468
Density, extrajunctional receptor, revised estimates of, in denervated rat diaphragm, acetylcholine receptors, 468
Dialyzed squid giant axons, effect of ATP on the calcium efflux in, 503
Diaphragm, denervated rat, revised estimates of extrajunctional receptor density in, acetylcholine receptors, 468
Discrete wave latency distribution and light absorption, independence of location of, in *Limulus* ventral nerve photoreceptors, 494
— waves and phototransduction in voltage-clamped ventral photoreceptors, 186
Diuretic, anti-, hormone-independent osmotic flow rectification, osmosis in cortical collecting tubules, 228

E

Efflux, calcium, in dialyzed squid giant axons, effect of ATP on, 503
—, sodium, and potential differences across the irrigated gill of sea water-adapted rainbow trout (*Salmo gairdneri*), 135
Effluxes and influxes, cation, relationship of, in yeast, 608
Endplate potentials, frog miniature, in adult, denervated, and tadpole leg muscle, multimodal distribution of, 85
Epinephrine, does it act by directly modifying the external surface charge?, mode of action of chronotropic agents in cardiac Purkinje fibers, 320
—, effects of, on the pacemaker potassium current of cardiac Purkinje fibers, 293
Epithelium, frog olfactory, unitary responses in, to sterically related molecules at low concentrations, 241
—, toad urinary bladder, passive electrical properties of, intercellular electrical coupling and transepithelial cellular and shunt conductances, 1
Equilibrium, non-, thermodynamic analysis of the coupling between active sodium transport and oxygen consumption, 732
— potential for the postsynaptic response in the squid giant synapse, 519

Erythrocyte membrane permeability deduced from bulk diffusion coefficients, 706
Erythrocytes, enlarged duck, functional separation of the Na-K exchange pump from the volume controlling mechanism in, 393
—, HK and LK goat, interaction of, with ouabain, 536
Exchange pump, Na-K, functional separation of, from the volume controlling mechanism in enlarged duck red cells, 393
Extracted, glycerol-, muscle fibers in rigor, relaxation, and contraction, differences in the charge distribution of, 551
Extrajunctional receptor density in denervated rat diaphragm, revised estimates of, acetylcholine receptors, 468
Extrusion, mechanism of sodium, across the irrigated gill of sea water-adapted rainbow trout (*Salmo gairdneri*), 148

F

Fibers, cardiac Purkinje, effects of epinephrine on the pacemaker potassium current of, 293
—, cardiac Purkinje, mode of action of chronotropic agents in, does epinephrine act by directly modifying the external surface charge? 320
—, glycerol-extracted muscle, in rigor, relaxation, and contraction, differences in the charge distribution of, 551
—, sodium-depleted cardiac Purkinje, effect on membrane potential and electrical activity of adding sodium to, 473
Flow rectification, ADH-independent osmotic, osmosis in cortical collecting tubules, 228
Force-generating capacity and contractile protein content of arterial smooth muscle, 691
Free calcium concentration, intracellular, changes in, during illumination of invertebrate photoreceptors, detection with aequorin, 643
Functional separation of the Na-K exchange pump from the volume controlling mechanism in enlarged duck red cells, 393

G

Giant axons, dialyzed squid, effect of ATP on the calcium efflux in, 503
— synapse, squid, equilibrium potential for the postsynaptic response in, 519
Gill, irrigated, of sea water-adapted rainbow trout (*Salmo gairdneri*), on the mechanism of sodium extrusion across, 148
—, irrigated, of sea water-adapted rainbow trout (*Salmo gairdneri*), sodium efflux and potential differences across, 135
Glycerol-extracted muscle fibers in rigor, relaxation, and contraction, differences in the charge distribution of, 551

H

Heart, living frog, resting sarcomere length-tension relation in, 343
Hermissenda, associative training of, 70
Hexose-proton cotransport system of *Chlorella*, pH-dependent change in K_m values and translocation constants of the uptake system, 568
Hormone-independent, antidiuretic, osmotic flow rectification, osmosis in cortical collecting tubules, 228
Hydrogen ion concentration, low, ionic conductance changes in voltage clamped crayfish axons at, 666
Hydrogen ion concentration-dependent change in K_m values and translocation constants of the uptake system, hexose-proton cotransport system of *Chlorella*, 568

I

Ileum, rabbit, characteristics of sodium flux from serosa to mucosa in, 274
—, rabbit, structure-affinity relationships of substrates for the neutral amino acid transport system in, 443
Illumination of invertebrate photoreceptors, changes in intracellular free calcium concentration during, detection with aequorin, 643
Impulses, mechanical, muscle compliance and longitudinal transmission of, 623
Influxes and effluxes, cation, relationship of, in yeast, 608
Inhibitors, carbonic anhydrase, used in short circuiting of the ocular oxygen concentrating mechanism in the teleost *Salmo gairdneri* 263
Intercellular electrical coupling and transepithelial cellular and shunt conductances, passive electrical properties of toad urinary bladder epithelium, 1
Intracellular free calcium concentration, changes in, during illumination of inver-

tebrate photoreceptors, detection with aequorin, 643
Invertebrate photoreceptors, changes in intracellular free calcium concentration during illumination of, detection with aequorin, 643

J

Junctional, extra-, receptor density in denervated rat diaphragm, revised estimates of, acetylcholine receptors, 468

L

Latency distribution, discrete wave, and light absorption, independence of location of, in *Limulus* ventral nerve photoreceptors, 494
Lateral interactions, active, preparations with, light-induced changes in photoreceptor membrane resistance and potential in gecko retinas, 49
— interactions, preparations treated to reduce, light-induced changes in photoreceptor membrane resistance and potential in gecko retinas, 26
Leaf movement and potassium flux in *Samanea saman*, phytochrome controlled movement, 431
— movement and potassium flux in *Samanea saman*, rhythmic movement, 413
Leg muscle, adult, denervated, and tadpole, multimodal distribution of frog miniature endplate potentials in, 85
Length-tension relation, resting sarcomere, in living frog heart, 343
Light absorption and discrete wave latency distribution, independence of location of, in *Limulus* ventral nerve photoreceptors, 494
— adaptation in the ventral photoreceptor of *Limulus*, 166
Light-induced changes in photoreceptor membrane resistance and potential in gecko retinas, preparations with active lateral interactions, 49
—, changes in photoreceptor membrane resistance and potential in gecko retinas, preparations treated to reduce lateral interactions, 26
Limulus ventral nerve photoreceptors, independence of location of light absorption and discrete wave latency distribution in, 494
— ventral photoreceptor, light adaptation in, 166
Liver plasma membranes, rat, calcium-binding properties and ATPase activities of, 104
Longitudinal transmission of mechanical impulses and muscle compliance, 623

M

Mammalian superficial proximal straight tubules, volume reabsorption, transepithelial potential differences, and ionic permeability properties in, 582
Mechanism, ocular oxygen concentrating, short circuiting of, in the teleost *Salmo gairdneri* using carbonic anhydrase inhibitors, 263
— of sodium extrusion across the irrigated gill of sea water-adapted rainbow trout (*Salmo gairdneri*), 148
—, volume controlling, in enlarged duck red cells, functional separation of the Na-K exchange pump from, 393
Membrane permeability, red cell, deduced from bulk diffusion coefficients, 706
— potential and electrical activity, effect on, of adding sodium to sodium-depleted cardiac Purkinje fibers, 473
— resistance, photoreceptor, and potential in gecko retinas, light-induced changes in, preparations with active lateral interactions, 49
— resistance, photoreceptor, and potential in gecko retinas, light-induced changes in, preparations treated to reduce lateral interactions, 26
Membranes, rat liver plasma, calcium-binding properties and ATPase activities of, 104
Michaelis constant values and translocation constants of the uptake system, pH-dependent change in, hexose-proton cotransport system of *Chlorella*, 568
Miniature endplate potentials, frog, in adult, denervated, and tadpole leg muscle, multimodal distribution of, 85
Mirsky, Alfred E., 1900–1974, obituary, 131
Molecules, sterically related, unitary responses in frog olfactory epithelium to, at low concentrations, 241
Mucosa, in rabbit ileum, characteristics of sodium flux from serosa to, 274
Multimodal distribution of frog miniature endplate potentials in adult, denervated, and tadpole leg muscle, 85
Muscle, arterial smooth, force-generating

capacity and contractile protein content of, 691
— compliance and the longitudinal transmission of mechanical impulses, 623
— fibers, glycerol-extracted, in rigor, relaxation, and contraction, differences in the charge distribution of, 551
—, leg, adult, denervated, and tadpole, multimodal distribution of frog miniature endplate potentials in, 85

N

Nerve photoreceptors, *Limulus* ventral, independence of location of light absorption and discrete wave latency distribution in, 494
Neutral amino acid transport system in rabbit ileum, structure-affinity relationships of substrates for, 443
Nonequilibrium thermodynamic analysis of the coupling between active sodium transport and oxygen consumption, 372

O

Obituary, Alfred E. Mirsky, 1900–1974, 131
Ocular oxygen concentrating mechanism, short circuiting of, in the teleost *Salmo gairdneri* using carbonic anhydrase inhibitors, 263
Olfactory epithelium, unitary responses in frog, to sterically related molecules at low concentrations, 241
Osmosis in cortical collecting tubules, ADH-independent osmotic flow rectification, 228
— in cortical collecting tubules, a theoretical and experimental analysis of the osmotic transient phenomenon, 201
Osmotic transient phenomenon, theoretical and experimental analysis of, osmosis in cortical collecting tubules, 201
Ouabain, interaction of HK and LK goat red blood cells with, 536
Oxygen concentrating mechanism, ocular, short circuiting of, in the teleost *Salmo gairdneri* using carbonic anhydrase inhibitors, 263
— consumption and active sodium transport, nonequilibrium thermodynamic analysis of the coupling between, 372

P

Pacemaker potassium current of cardiac Purkinje fibers, effects of epinephrine on, 293
Passive electrical properties of toad urinary bladder epithelium, intercellular electrical coupling and transepithelial cellular and shunt conductances, 1
Permeability properties, ionic, volume reabsorption, and transepithelial potential differences in mammalian superficial proximal straight tubules, 532
—, red cell membrane, deduced from bulk diffusion coefficients, 706
Phosphatase, adenosine tri-, activities and calcium-binding properties of rat liver plasma membrane, 104
Phosphate, adenosine tri-, effect of, on the calcium efflux in dialyzed squid giant axons, 503
Photoreceptor of *Limulus*, ventral, light adaptation in, 166
— membrane resistance and potential in gecko retinas, light-induced changes in, preparations with active lateral interactions, 49
— membrane resistance and potential in gecko retinas, light-induced changes in, preparations treated to reduce lateral interactions, 26
Photoreceptors, invertebrate, changes in intracellular free calcium concentration during illumination of, detection with aequorin, 643
—, *Limulus* ventral nerve, independence of location of light absorption and discrete wave latency distribution in, 494
—, voltage-clamped ventral, discrete waves and phototransduction in, 186
Phototransduction and discrete waves in voltage-clamped ventral photoreceptors, 186
Phytochrome controlled movement, potassium flux and leaf movement in *Samanea saman*, 431
Plasma membranes, rat liver, calcium-binding properties and ATPase activities of, 104
Potassium current, pacemaker, of cardiac Purkinje fibers, effects of epinephrine on, 293
— flux and leaf movement in *Samanea saman*, phytochrome controlled movement, 431
— flux and leaf movement in *Samanea saman*, rhythmic movement, 413
—, high and low, goat red blood cells, interaction of, with ouabain, 536
Potassium-sodium exchange pump, functional separation of, from the volume con-

trolling mechanism in enlarged duck red cells, 393
Protein content, contractile, and force-generating capacity of arterial smooth muscle, 691
Proton, hexose-, cotransport system of *Chlorella*, pH-dependent change in K_m values and translocation constants of the uptake system, 568
Proximal straight tubules, mammalian superficial, volume reabsorption, transepithelial potential differences, and ionic permeability properties in, 582
Pump, Na-K exchange, functional separation of, from the volume controlling mechanism in enlarged duck red cells, 393
Purkinje fibers, cardiac, effects of epinephrine on the pacemaker potassium current of, 293
— fibers, cardiac, mode of action of chronotropic agents in, does epinephrine act by directly modifying the external surface charge? 320
— fibers, sodium-depleted cardiac, effect on membrane potential and electrical activity of adding sodium to, 473

R

Red blood cells. *See* Erythrocytes.
Relaxation, rigor, and contraction, differences in the charge distribution of glycerol-extracted muscle fibers in, 551
Resistance, photoreceptor membrane, and potential in gecko retinas, light-induced changes in, preparations with active lateral interactions, 49
—, photoreceptor membrane, and potential in gecko retinas, light-induced changes in, preparations treated to reduce lateral interactions, 26
Resting sarcomere length-tension relation in living frog heart, 343
Retinas, gecko, light-induced changes in photoreceptor membrane resistance and potential in, preparations with active lateral interactions, 49
—, gecko, light-induced changes in photoreceptor membrane resistance and potential in, preparations treated to reduce lateral interactions, 26
Rhythmic movement, potassium flux and leaf movement in *Samanea saman*, 413
Rigor, relaxation, and contraction, differences in the charge distribution of glycerol-extracted muscle fibers in, 551

S

Salmo gairdneri, rainbow trout, sea water-adapted, on the mechanism of sodium extrusion across the irrigated gill of, 148
—, rainbow trout, sodium efflux and potential differences across the irrigated gill of sea water-adapted, 135
—, teleost, short circuiting of the ocular oxygen concentrating mechanism in, using carbonic anhydrase inhibitors, 263
Samanea saman, potassium flux and leaf movement in, phytochrome controlled movement, 431
—, potassium flux and leaf movement in, rhythmic movement, 413
Sarcomere, resting, length-tension relation in living frog heart, 343
Sea water-adapted rainbow trout (*Salmo gairdneri*), on the mechanism of sodium extrusion across the irrigated gill of, 148
— rainbow trout (*Salmo gairdneri*), sodium efflux and potential differences across the irrigated gill of, 135
Separation, functional, of the Na-K exchange pump from the volume controlling mechanism in enlarged duck red cells, 393
Serosa to mucosa in rabbit ileum, characteristics of sodium flux from, 274
Short circuiting of the ocular oxygen concentrating mechanism in the teleost *Salmo gairdneri* using carbonic anhydrase inhibitors, 263
Smooth muscle, arterial, force-generating capacity and contractile protein content of, 691
Society of General Physiologists, abstracts of papers presented at the Twenty-Eighth Annual Meeting of, follows p. 729
Sodium efflux and potential differences across the irrigated gill of sea water-adapted rainbow trout (*Salmo gairdneri*), 135
— extrusion, mechanism of, across the irrigated gill of sea water-adapted rainbow trout (*Salmo gairdneri*), 148
— flux, characteristics of, from serosa to mucosa in rabbit ileum, 274
— transport, active, and oxygen consumption, nonequilibrium thermodynamic analysis of the coupling between, 372
Sodium-depleted cardiac Purkinje fibers,

effect on membrane potential and electrical activity of adding sodium to, 473
Sodium-potassium exchange pump, functional separation of, from the volume controlling mechanism in enlarged duck red cells, 393
Sterically related molecules at low concentrations, unitary responses in frog olfactory epithelium to, 241
Straight tubules, mammalian superficial proximal, volume reabsorption, transepithelial potential differences, and ionic permeability properties in, 582
Structure-affinity relationships of substrates for the neutral amino acid transport system in rabbit ileum, 443
Substrates, structure-affinity relationships of, for the neutral amino acid transport system in rabbit ileum, 443
Superficial proximal straight tubules, mammalian, volume reabsorption, transepithelial potential differences, and ionic permeability properties in, 582
Surface charge, external, does epinephrine act by directly modifying, mode of action of chronotropic agents in cardiac Purkinje fibers, 320
Synapse, squid giant, equilibrium potential for the postsynaptic response in, 519
System, hexose-proton cotransport, of *Chlorella*, pH-dependent change in K_m values and translocation constants of the uptake system, 568
—, neutral amino acid transport, in rabbit ileum, structure-affinity relationships of substrates for, 443
—, uptake, pH-dependent change in K_m values and translocation constants of, hexose-proton cotransport system of *Chlorella*, 568

T

Teleost, *Salmo gairdneri*, short circuiting of the ocular oxygen concentrating mechanism in, using carbonic anhydrase inhibitors, 263
Tension-length relation, resting sarcomere, in living frog heart, 343
Thermodynamic analysis, nonequilibrium, of the coupling between active sodium transport and oxygen consumption, 372
Training, associative, of *Hermissenda*, 70
Transepithelial potential differences, volume reabsorption, and ionic permeability properties in mammalian superficial proximal straight tubules, 582
Transient phenomenon, osmotic, theoretical and experimental analysis of, osmosis in cortical collecting tubules, 201
Translocation constants and K_m values of the uptake system, pH-dependent change in, hexose-proton cotransport system of *Chlorella*, 568
Transmission, longitudinal, of mechanical impulses, and muscle compliance, 623
Triphosphatase, adenosine, activities and calcium-binding properties of rat liver plasma membranes, 104
Triphosphate, adenosine, effect of, on the calcium efflux in dialyzed squid giant axons, 503
Tubules, cortical collecting, osmosis in, ADH-independent osmotic flow rectification, 228
—, cortical collecting, osmosis in, a theoretical and experimental analysis of the osmotic transient phenomenon, 201
—, mammalian superficial proximal straight, volume reabsorption, transepithelial potential differences, and ionic permeability properties in, 582

U

Unitary responses in frog olfactory epithelium to sterically related molecules at low concentrations, 241
Uptake system, pH-dependent change in K_m values and translocation constants of, hexose-proton cotransport system of *Chlorella*, 568
Urinary bladder epithelium, toad, passive electrical properties of, intercellular electrical coupling and transepithelial cellular and shunt conductances, 1

V

Ventral nerve photoreceptors, *Limulus*, independence of location of light absorption and discrete wave latency distribution in, 494
— photoreceptor of *Limulus*, light adaptation in, 166
— photoreceptors, voltage-clamped, discrete waves and phototransduction in, 186
Volume controlling mechanism in enlarged duck red cells, functional separation of the Na-K exchange pump from, 393
— reabsorption, transepithelial potential differences, and ionic permeability prop-

erties in mammalian superficial proximal straight tubules, 582

W

Wave, discrete, latency distribution and light absorption, independence of location of, in *Limulus* ventral nerve photoreceptors, 494

Waves, discrete, and phototransduction in voltage-clamped ventral photoreceptors, 186

Y

Yeast, relationship of cation influxes and effluxes in, 608

Statement on Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of General Physiology, Published monthly at 1230 York Ave; New York 10021 by The Rockefeller University Press, New York 10021. Editor: Paul F. Cranefield, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 2896; sales through dealers, street vendors, counter sales, 0; mail subscriptions 2452. Total paid circulation, 2452; free distribution 63; office use, left-over, unaccounted, spoiled, 381; net press run, 2896. Single issue nearest filing date Oct. 1974. (Signed W. A. Bayless, Director).
